## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed 7/25/2005 have been fully considered and are persuasive. The Restriction Requirement set forth in the previous Office Action is therefor withdrawn and replaced with the following Action.

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-17 and 41-57, drawn to a method and apparatus for filling bags, classified in class 53 subclass 459.
  - II. Claims 18-40, drawn to a machine for forming and filling bags, classified in class 53, subclass 567.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, Invention I does not require the forming or sealing stations of Invention II, but could use preformed bags.

Art Unit: 3721

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
